**4. WASTE INFORMATION**

DESCRIPTION OF WASTE: TOXIC LIQUIDS

EPA WASTE NUMBER: F009, F007, D003, D002, D008, D011

DOT PROPER SHIPPING NAME: RQ, Waste toxic, liquid, corrosive, inorganic, n.o.s., (potassium cyanide, sodium hydroxide), 6.1 (8), UN 3289, PG II (F009) (F007) (D003) (D002) (D008) (D011)

DOT HAZARD CLASS: Primary: 6 (TOXIC)  
Subsidiary: 8 (CORROSIVE)

DOT ID CODE (UN/NA): UN 3289

**5. SHIPPING INFORMATION**

NUMBER OF SHIPMENTS DURING THE CALENDAR YEAR: 27

TOTAL VOLUME OF THIS WASTE SHIPPED: 365,740 kg (806,457 lbs.)

**6. WASTE MINIMIZATION STATEMENT**

NOT REQUIRED (PER 40 CFR 262.41): ☐

SUBMITTED WITH EPA BIENNIAL REPORT: ☐

ATTACHED ☒

**7. CERTIFICATION**

I CERTIFY UNDER PENALTY OF LAW THAT I HAVE PERSONALLY EXAMINED AND AM FAMILIAR WITH THE INFORMATION SUBMITTED IN THIS AND ALL ATTACHED DOCUMENTS, AND THAT BASED ON MY INQUIRY OF THOSE INDIVIDUALS IMMEDIATELY RESPONSIBLE FOR OBTAINING THE INFORMATION, I BELIEVE THAT THE SUBMITTED INFORMATION IS TRUE, ACCURATE, AND COMPLETE. I AM AWARE THAT THERE ARE SIGNIFICANT PENALTIES FOR SUBMITTING FALSE INFORMATION INCLUDING THE POSSIBILITY OF FINE AND IMPRISONMENT.

## **WASTE MINIMIZATION STATEMENT FOR CALENDAR YEAR 2010**

We are currently exporting a by-product generated from precious metal refining operations. This material was originally processed in-house or by U.S. treatment facilities. A 2003 cost effectiveness analysis determined a financial benefit existed if foreign companies handled the material. In the 1<sup>st</sup> quarter of 2004, we initiated the process to have the by-product exported to treatment facilities in Canada.

We generated and exported approximately 806,457 pounds of material in calendar year 2010.

Our 2009 / 2010 EPA Acknowledgement of Consent to Export covered the period from April 30, 2009 to April 28, 2010. While our 2010 / 2011 EPA Acknowledgement of Consent covers the period from February 22, 2010 to February 19, 2011.

In 2009, we projected a five- (5) percent increase in processed materials for calendar year 2010. An actual twenty- (20) percent decrease occurred. Based on 2010 data, we project a five- (5) percent increase for 2011.

In 1995, our Company instituted a revised waste reduction program and we are very confident that the program uses the "Best Affordable Technology" available. We will continue to use the good housekeeping practices and inventory control procedures incorporated with our first waste minimization program (1991). In addition, we'll continue to investigate the possibilities of using U.S. treatment facilities to process this by-product.

Our precious metal refining streams remained on par with previous year's materials. The toxicity of this material has remained roughly the same since 1991 and we do not anticipate any major variance in the future.

We, at Advanced Chemical Company, are committed to reducing our wastes. This is done not only for economic reasons, but also for the greater environmental impact it holds for the future. Advanced will continue to seek State of the Art Technology to improve this crucial area when economically feasible.

## **WASTE MINIMIZATION STATEMENT FOR CALENDAR YEAR 2009**

We are currently exporting a by-product generated from precious metal refining operations. Due to the economic value of the contained precious and semi-precious metals, Xstrata Canada Corporation accepts the material for secondary recovery and returns the available metal, less processing fees, to Advanced Chemical Company.

We generated approximately 17,275 pounds of material in the 2010 calendar year. Our facility exported approximately 20,815 pounds of material in the 2010 calendar year. Of the amount exported, approximately 8,118 pounds were generated between August 1<sup>st</sup> and December 31<sup>st</sup> of 2009 and exported with the first shipment of 2010. Advanced processed the remaining 4,578 lbs of the 2010 generated material in-house. We used a newly developed technology and hope that this new process will eliminate the need of any future export shipments.

Our 2009 / 2010 EPA Acknowledgement of Consent to Export covers the period from July 30, 2009 to July 29, 2010. While our 2010 / 2011 EPA Acknowledgement covers the period from August 17, 2010 to August 16, 2011.

In 2009, we projected a five- (5) percent increase in processed materials for the 2010 calendar year. An actual twenty- (20) percent decrease occurred. Based on 2010 data, we project a five- (5) percent increase in 2011.

We anticipate the by-product level to remain roughly the same as 2010, but because of the new process technology, do not anticipate any material exportation in 2011.

We have completed all phases of our 1995 waste reduction program. We feel very confident that our program uses the "Best Affordable Technology" available. We will continue to use the good housekeeping practices and inventory control procedures that have been incorporated since the initiation of our first waste minimization program in 1991.

Our precious metal refining streams remained on par with last year's materials. The toxicity of this material has remained roughly the same since 1991 and we do not anticipate any major variance in the future.

We, at Advanced Chemical Company, are committed to reducing our wastes. This is done not only for economic reasons, but also for the greater environmental impact it holds for the future. Advanced will continue to seek State of the Art Technology to improve this crucial area when economically feasible.
